

HEALTHCARE - Task Force

Priorities

Streamlining public health funds - better spending of public funds, following the patient as a **possible** solution

Launching a campaign to convince Romanian doctors to return home. Opening the labor market for other physicians

Streamlining medical system - reverse pyramid of services. More outpatient, less inpatient

Transparency of medical services and increase of quality in services - patients transfer from public to private and vice-versa

Elderly homes and geriatric treatment and facilities

Promoting medical subscription and medical insurances without affecting the minimum essential package of the National Health Fund

The consolidation of the separation between public and private for emergency services
